DRAFT B, July 2005

About This Report and Other Products of the Study

This document is the final report of the Northside Drive Corridor Study and contains a full description of each phase of the Study. The organization of the report matches the chronological execution of the study process: the first section describes the existing conditions, issues and opportunities of the corridor and study area, the second section describes the study methodology, the third describes the study recommendations, and the final section gives details of the recommended action plan. The Appendix contains detailed information which may be useful as a reference, but would not ordinarily be read as primary material of the study.

In addition to this report, several other documents are available:

Northside Drive Plan Overview – This is a 4-page color brochure that gives a general overview of the Plan and its recommendations. It is appropriate for a general audience as an introductory overview of the Plan and its recommendations.

Northside Drive Corridor Study Recommended Projects – This is a concise listing of recommended projects taken from the Implementation section of the full report.

Obtaining these Products

All study documents and other materials are available on the Internet from the Bureau of Planning web site:

<http://www.AtlantaGA.gov/government/planning/burofplanning.aspx>

Look for the link to Northside Drive Corridor Study.

In addition, library copies are available at the Bureau of Planning, City Hall, 55 Trinity Ave. SW, Suite 3350, Atlanta, GA 30303. These copies can be reviewed at the Bureau of Planning and individual pages may be copied in black and white for a slight fee.

A small number of for-sale copies of the plan will be produced and made available through the Bureau of Planning after the plan has been approved by the Atlanta City Council and Mayor. These copies include all color maps.
